**Please find below and/or attached an Office communication concerning this application or proceeding.**

The time period for reply, if any, is set in the attached communication.

***Response to Arguments and Amendments***

1. Applicant argues that the recitations in independent claims 1, 7, and 10, make it clear that the claimed methods and device perform the step of storing in memory time-related communications parameters concerning "each failure in the establishment of a communications channel" and "each success in the establishment of a communication channel," therefore, the step of recording each failure in the establishment of a communications channel is simply not taught or otherwise disclosed by US '116 or US '789, and that this means that the combination of US '116 and US '789 is deficient because this combination fails to teach all of the elements of the claimed methods and device.
2. In response to Applicant's argument, Examiner will not address these issues, due to the fact that the limitations, in which Applicant is basing argument on, were added to the claims, after Final rejection, therefore, requiring further consideration and/or search by Examiner.
